

DEPARTMENT OF STATE  
ASSISTANT SECRETARY

October 22, 1962

THE UNDER SECRETARY:

Here's a very quick draft  
of a resolution on the Secretary's  
idea.

The Irish would be the ideal  
introducers.

QUESTION: Should we work this up  
and have Stevenson begin to float  
the idea in the conversation he  
is planning to have with Foreign  
Minister Aiken just before the  
President's speech?

Harlan Cleveland

DECLASSIFIED

CONFIDENTIAL

The Security Council,

Recalling that one of the basic objectives in any plan for general and complete disarmament includes the elimination of all means of delivery of weapons of mass destruction;

Noting with concern that the establishment of missile bases in Cuba has resulted in a dangerous increase in tension;

1. Requests the SYG to dispatch UN observers to all bases <sup>outside the territory of the nuclear powers</sup> where there may be reason to assume that missiles are located;

2. Requests the UN observers to verify whether there are at such locations missiles equipped with nuclear warheads or capable of being so equipped and to report these findings to the SYG;

3. Requests the SYG to transmit this information to the ENDC which should convene immediately at the heads of government level to study these findings and make recommendations on arrangements which <sup>promote the</sup> ~~will permit~~ international safeguards against aggressive use of these weapons;

4. <sup>11 ENDC</sup> Calls upon the ~~ENDC~~ to redouble its efforts to achieve agreement on ~~ENDC~~ general and complete disarmament;

5. Requests the 18 ENDC to give priority to concluding a treaty with effective and prompt international verification which prohibits nuclear weapons tests in all environments for all times; or if such agreement cannot be reached expeditiously to seek to conclude an interim treaty prohibiting nuclear weapons tests in those environments where radioactive fallout is a matter of international concern and where nuclear weapons tests can be detected and identified without international controls; namely, the atmosphere, the ocean, and space.
